3. Membuat table user

The screenshot shows the phpMyAdmin interface for a database named 'data_barang'. The 'user' table is selected, and its structure is displayed. The table has the following columns:

#	Nome	Jenis	Propertion	Attribut	Tak Terbilang	Rowson	Komente	Ekstra	Terdikon
1	id	int(11)		Tidak	Tidak ada		AUTO_INCREMENT		Ubah Hapus
2	username	varchar(50)	latin1_swedish_ci	Tidak	Tidak ada				Ubah Hapus
3	password	varchar(50)	latin1_swedish_ci	Tidak	Tidak ada				Ubah Hapus
4	kolom	int(11)		Tidak	Tidak ada				Ubah Hapus

The 'id' column is the primary key. The 'username' and 'password' columns are also indexed. The 'kolom' column is a foreign key to the 'id' column of the 'data_barang' table.
